

A Level Computing – Day 1-10 Pack

During the Easter break work on the following to complete your NEA project:

1) Development

- Coding including comments and subprograms
- Documentation of iterative testing using test data from design
- Ensure every point on the marking grid has been met to maximise marks

2) Design

- Improve usability diagrams and algorithms
- Use development to enhance design section
- this can be done by writing algorithms for what you have coded.

3) Evaluation

- Post development testing
